About Me

Being a native of the island of São Miguel, I had to travel to the mainland to attempt University of Minho in Guimarães.

During my master's thesis, I collaborated in the office where I would become an intern, which allowed me to learn the essentials about the profession.

Very interested in BIM and related topics, integrate in the European Master In BIM from BIM A+.

I consider myself as curious, helpful and extroverted person, always motivated by new challenges.

I am a proactive person who loves to participate in various activities related to my field of study and architecture competitions.
